Symbol x EUR 2,5 Amount, EUR

PLEASE NOTE: Large-format printing does not have strict color rendering standards (as opposed to offset printing), so when printing the same file using different large-format printers or different materials, the result will differ. To have color rendering as expected per each layout, a coloring test is required, only this way you may be confident you will have correct color rendering of your files.

Please note that no claims for color rendering of any printed file without an approved coloring test shall be accepted.
